3.2 COMMAND CARD

VOICE CONTROL TIPS

- 1 When the robot's eyes are BLUE, he is listening for "Meccanoid" (or his custom name if it has been changed).
- 2 Then say "Main Menu", "Motion Control" or "Settings" to navigate between the three voice command sections, shown below.
- 3 Then you can say a voice command from the section that you have selected.
- 4 Speak clearly when giving a voice command. Not too fast, not too slow.
- 5 Meccanoid cannot listen and speak at the same time, so make sure he's done speaking before giving a voice command.

3.3 VOICE COMMANDS

1 When the Robot's eye's are **BLUE**, he is listening for "Meccanoid" (or custom name).

2 After hearing his name, his eyes will turn **GREEN**. Now say any Main Menu command.

 Say: Introduce yourself*

 Meccanoid will: Introduce himself.

 Say: List commands

 Meccanoid will: List all voice commands available in the current mode.

 Say: High five*

 Meccanoid will: Raise up his arm and ask for a high five.

Note: Gently but firmly push his hand back to give him a high five.

 Say: Tell me a Joke*

 Meccanoid will: Tell a joke.

 Say: Walk with me*

 Meccanoid will: Ask you to take his hand and lead him on a walk.

Note: Lift the robot's hand and he will start moving forward. When you are finished, drop Meccanoid's hand and he will stop.

 Say: Motion control

 Meccanoid: Eyes will turn orange and he will wait for your next command. Say one of these commands:

- Forward
- Backward
- Left Turn
- Right Turn
- Turn Around
- Kung Fu*
- Exercise*
- Dance*
- Help
- Main Menu
- List Commands

Note: In this menu, you only need to say the command. For example, say "Forward" and Meccanoid will move forward.

Note: Say "List Commands" for available commands in this menu.

 Say: Shake hands*

 Meccanoid will: Lift his right hand and ask you to shake hands

 Say: What time is it?*

 Meccanoid will: Tell you the time.
Note: You will first need to set the correct time in settings

 Say: Record L-I-M

 Meccanoid will: Tell you how to program using Learned Intelligent Movement, or L.I.M.™

L.I.M.™ allows you to create animations by physically moving the robot which you can then name and store in the L.I.M.™ library.

 Say: L-I-M library

 Meccanoid will: Allow you to play one of the recordings, in your L.I.M. library.

 Say: Help

 Meccanoid will: Tell current mode and gives helpful tips about the current mode.

 Say: Main Menu

 Meccanoid will: Exit to Main Menu.

 Say: Settings

 Meccanoid will: Eyes will turn purple and he will wait for your next command. Say one of these commands:

- Set Date
- Set Clock
- Learn my name
- Name Robot
- Systems Check
- Adjust Volume
- Help
- Main Menu
- List Commands

 Say: Go to sleep

 Meccanoid will: Go to sleep
Note: press any button to wake up Meccanoid.

TIP: Press any button when they are all unlit in order to freeze the robot. The robot will tell you about its button functions.

* Please note that the voice commands with an asterisk (*) beside them will not work in Drone mode. Drone mode is only for alternative builds and is not recommended for Meccanoid when assembled as shown in this instruction manual.
To enter Drone mode, slide the mode switch to DRONE MODE.
